Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-13 and 16 are rejected under 35 U.S.C. 102(a) & (e) as being anticipated by Jacobs et al (U.S. Patent No. 4,943,414).

Jacobs et al teaches a system for sterilizing a lumen having a first end and a second end.

The system of Jacobs et al discloses a container 45 defining an enclosed volumen with at least

one interface and adjustable opening 32 on a wall of the container wherein the container 45 does not contain germicide* (see Figure 2A). *Note: In the embodiment of Figure 2A, cartridge 47 contains the germicide, but the enclosed volumen of the

container 45 does not contain germicide. The container and attached lumen is placed within a chamber and the chamber evacuated by a pump. See col.1, lines 54-64. The germicide within cartridge 47 may be hydrogen peroxide. See col.3, line 59.

Response to Arguments

3. Applicant's arguments filed 18 January 2005 have been fully considered but they are not persuasive.

Applicant argues that the "adaptor" (container 45) of Jacobs et al does not define an

Art Unit: 1744

enclosed volume, but does not give any reasons in support of this allegation. If Applicant means that because the container 45 of Jacobs et al has an opening at either end, the volume is not “enclosed”, the Examiner notes that Applicant’s own container 4 has an opening at an end thereof and thus, would not define an “enclosed” volume by this definition. Therefore, using Applicant’s Figure 12 as a guide the Examiner will define “enclosed volume” to be a volume surrounded in part by walls of the container.

4. The Terminal Disclaimer filed 18 January 2005 is sufficient to overcome the double-patenting rejection of claims 1-9, 14, and 15.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
